360 Night Perimeter Surveillance At Electro Optical

Extremely wide area coverage: 360 ° in azimuth; Simultaneous, automatic and real-time detection and tracking of multiple intrusions in all directions; Easy to deploy and use! No optical distortion in panoramic image; Cost effective: with fewer cameras required for surveillance of wide areas (only one Spynel-S sensor needed to cover same space)

Spynel-S, 360 ° Infrared Detection System - Electro-optics ...

GSR-360 is an ultra long range Ground Surveillance Radar uses the latest generation pulse-Doppler solid-state technology to provide complete 360 ° coverage for 24/7 day night situational awareness with up to 1200km² of vehicle detection and up to 300km² of human detection.

360 Degree Long Range Ground Surveillance Radar Perimeter ...

The Infrared Surveillance Solution: Spynel. With 360 ° protection and outdoor perimeter intrusion detection, the Spynel IR camera systems provide exceptional day and night security for many of governmental buildings in the world, and varied applications. Surveillance of national monuments, protection of government buildings, embassies, federal reserve banks...

Critical Infrastructure Protection - Security ...

The FOVEA from Syperion Vision is a 360 ° monitoring system capable of observing large perimeters up to several kilometers. It continuously captures high resolution images from a central point and detects and auto-matically evaluates motion or changes within the field of view. Due to the fast rotation of the FOVEA you can cover a huge perimeter

360 ° perimeter security - xenics.com

360 ° Day & Night Airport Surveillance : The Spynel Solution The Spynel panoramic infrared security system ensures airports' security around the world and covers their surveillance needs. Our infrared systems use a continuously rotating head to produce 360 degree images.

Airport Surveillance & Airfield Surveillance - Security ...

The Viseum 360 CCTV Camera is the only security camera in the world to help you to: If your remote site is suffering high crime and you have tried everything. This 360 Security Camera can instantly create your remote site ' s long-term deterrent. Meet any remote site ' s surveillance requirements and address all locally targeted security threats.

360 Security Camera Viseum IMC™ AI CCTV Surveillance System

360 Vision Thermal. 360 Vision Technology has a well-deserved reputation for outstanding product research and development. Their team of highly experienced software, hardware and mechanical engineers have consistently innovated and developed unique products for the security industry.

360 Vision Thermal | AlertSystems Ltd

The SC-360 perimeter sur The SC-360 is a low-cost radar-based solution for wide area perimeter protection and intruder detection. With its 200m target detection range, a single SC-360 will protect an area of over 125,000 square meters, automatically slewing a PTZ camera to focus on the intruder and triggering an alarm.

A complete reference on CCTV technology Gives practical advice on the proper uses of CCTV to best protect against crime Contains more than 100 photos of the most modern equipment available.

The Passive Panoramic Image Fusion (PPIF) system provides 360 degree situational awareness to the crew of an armored combat, surveillance and troop transport vehicle during the day or night. Real time, pixel based fusion of infrared and visual video with pan and zoom capability. It aids armed urban operation with surveillance, peace keeping operations, and perimeter control. It encompasses 3 band fusion: near infrared, far infrared, and visible.

The word Zulu means ' heaven ' , but for the suddenly besieged and minute British garrison at Rorke ' s Drift, among them a key faction of Irish soldiers, it represented a hellish horde of warriors from the Zulu nation. A Bloody Night documents the terrifying struggle of these Irishmen as thousands of poorly armed but well-trained Zulus unexpectedly hurled themselves in a head-long, deadly onslaught against their hastily barricaded trading station and mission hospital. The battle, a defining clash in the 1879 Anglo-Zulu war, was a bare struggle for survival; the deeds and heroics of the Irish soldiers, subdued within the grand narrative, were no less exceptional than that of their English counterparts. Dan Harvey brings examples of their sheer resilience to the fore. The defence of Rorke ' s Drift was an epic encounter and an exceptional piece of soldiering. Its tale of courage in adversity against impossible odds endures; the little-known but significant role of those Irishmen present is no less absorbing a story, and all the more intriguing for its unheralded heroism.

Although a cease-fire agreement was signed in Panmunjeom on July 27, 1953, fighting between North and South Korea never stopped. The hot war was replaced by a low-intensity war. Terrorism, assassinations, infiltration of spies, and the like replaced tank battles and artillery duels. Until 1993, the United States patrolled its sector of the DMZ (demilitarized zone) in South Korea. In *Call Sign: Purple Three*, author Mark Heathco, who pulled 385 missions inside the DMZ during his military career, describes the preparation for a dangerous patrol in August 1985. This memoir follows the soldiers as they arrive at Warrior Base, refit for war, and finally execute the patrol itself. With great detail, *Call Sign: Purple Three* provides keen insight into the Korean DMZ at a time when the world thought all was well in Korea, but in reality chaos was just a hair trigger away. This insider's memoir offers an understanding of what these soldiers did and the sacrifices they made.

Soldier's Reverie takes you on multiple journeys—each one a story of its own and each one intertwined with another. Whether it's being conned by smooth ladies of the night or isolated and fighting for your life, the story paints a vivid portrait and drops you right in the middle of it. You will feel the sweltering tropical heat and experience the chill of the monsoon rains and know more about the garrison soldiers, McNamara's 100,000, black marketers, mamasans, business girls, recon soldiers, the "too often caught in the middle" Vietnamese villages, and the Viet Cong. As their lives evolve and stories intertwine, war touches all of them—from a middle school dropout becoming a recon team tail gunner and from a goose herder becoming a lethal Viet Cong tracker.

Panoramic cameras offer true real-time, 360-degree coverage of the surrounding area, valuable for a variety of defense and security applications, including force protection, asset protection, asset control, security including port security, perimeter security, video surveillance, border control, airport security, coastguard operations, search and rescue, intrusion detection, and many others. Automatic detection, location, and tracking of targets outside protected area ensures maximum protection and at the same time reduces the workload on personnel, increases reliability and confidence of target detection, and enables both man-in-the-loop and fully automated system operation. Thermal imaging provides the benefits of all-weather, 24-hour day/night operation with no downtime. In addition, thermal signatures of different target types facilitate better classification, beyond the limits set by camera's spatial resolution. The useful range of catadioptric panoramic cameras is affected by their limited resolution. In many existing systems the resolution is optics-limited. Reflectors customarily used in catadioptric imagers introduce aberrations that may become significant at large camera apertures, such as required in low-light and thermal imaging. Advantages of panoramic imagers with high image resolution include increased area coverage with fewer cameras, instantaneous full horizon detection, location and tracking of multiple targets simultaneously, extended range, and others. The Automatic Panoramic Thermal Integrated Sensor (APTIS), being jointly developed by Applied Science Innovative, Inc. (ASI) and the Armament Research, Development and Engineering Center (ARDEC) combines the strengths of improved, high-resolution panoramic optics with thermal imaging in the 8 - 14 micron spectral range, leveraged by intelligent video processing for automated detection, location, and tracking of moving targets. The work in progress supports the Future Combat Systems (FCS) and the In.
