A bold manifesto by two business leaders, *A Billion Bootstraps* shows why microcredit is the world's most powerful poverty-fighting movement-and an unbeatable investment for your charitable donations. *A Billion Bootstraps* unearths the roots of the microcredit revolution, revealing how the pioneering work of people such as Dr. Muhammad Yunus-winner of the 2006 Nobel Peace Prize-is giving hope to billions. Philanthropist and self-made millionaire Phil Smith and microcredit expert and consultant Eric Thurman provide a riveting narrative that explores how these small loans, arranged by "barefoot bankers," enable impoverished people to start small businesses, support their families, and improve local economies. By paying back their loans instead of simply accepting handouts, men and women around the world are continually giving others the same opportunity to change their futures. Smith and Thurman also examine why traditional charity programs, while providing short-term relief, often perpetuate the problems they are trying to alleviate, and how applying investment principles to philanthropy is the key to reversing poverty permanently. *A Billion Bootstraps* explains how ordinary people can accelerate the microcredit movement by investing charitable donations in specific programs and then leveraging those contributions so the net cost to lift one person out of poverty is remarkably low. You'll discover how to get more for your money by donating with the mind-set of an investor and calculating measurable returns-returns that will change lives and societies forever.

A compelling call to carry God's mercy and compassion to the hurting people of this world This eminently practical book by two leading experts in the field of poverty reduction offers a clear plan to help ordinary Christians translate their compassion into thoughtful action. Authors Peter Greer and Phil Smith draw on their personal experiences to provide proven solutions for effectively reducing poverty. With photographs by Jeremy Cowart included throughout, *The Poor Will Be Glad* examines the pitfalls of traditional approaches and outlines a new model of economic development aimed at breaking the cycle of dependency. Through microfinance and employment-based solutions, people who share God's heart for the poor can reorient their efforts from giving handouts to offering a hand up, helping others provide for their families and regain their dignity. This book provides straightforward guidance for individuals and groups eager to carry God's justice, mercy, and compassion to the hurting people in our

A Billion Bootstraps unearths the roots of the microcredit revolution, revealing how the pioneering work of people such as Dr. Muhammad Yunus-winner of the 2006 Nobel Peace Prize-is giving hope to billions. Philanthropist and self-made millionaire Phil Smith and microcredit expert and consultant Eric Thurman provide a riveting narrative that explores how these small loans, arranged by barefoot bankers, enable impoverished people to start small businesses, support their families, and improve local economies. By paying back their loans instead of simply accepting handouts, men and women around the world are continually giving others the same opportunity to change their futures.

Well-meaning Westerners want to find ways to help the less fortunate. Today, many are not just volunteering abroad and donating to international nonprofits but also advancing innovations and launching projects that aim to be socially transformative. However, often these activities are not efficient ways of helping others, and too many projects cause more harm than good. Reimagining Global Philanthropy shares the journey of a conservative banker and a progressive professor to find a better way forward. Kirk S. Bowman and Jon R. Wilcox explain the boom in the global compassion industry, revealing the incentives that produce inefficient practices and poor outcomes. Instead of supporting start-up projects with long-shot hopes for success, they argue, we can dramatically improve results by empowering local leaders. Applying lessons from the success of community banks, Bowman and Wilcox develop and implement a new model that significantly raises philanthropic efficacy. Their straightforward and rigorously tested approach calls for community members to take the lead while outside partners play a supporting role. Bowman and Wilcox recount how they tested the model in Brazil, demonstrating the value of giving people in marginalized communities the

Access Free A Billion Bootstraps Microcredit Barefoot Banking And The

opportunity to innovate. In a time of widespread social reckoning, this book shows how global philanthropy can confront its blind spots and failures in order to achieve truly transformative outcomes. Readers can access five of the documentary films discussed in the book on a companion website. In addition to the films, chapter discussion questions and other supplemental materials are also available at the site.

The Credibility of Microcredit offers an objective assessment of microfinance worldwide by way of interdisciplinary research. It features works from leading researchers in the field of microfinance, as well as new names, employing a variety of methods and theoretical approaches.

Microcredit has been seen in recent decades as having great potential for aiding development in poor developing countries, with Bangladesh being one of the countries which has pioneered microcredit and implemented it most widely. This book, based on extensive original research, explores how microcredit works in practice, and assesses its effectiveness. It discusses how microcredit, usually channelled through women, is often passed to the men of the family, a practice disapproved of by some, but regarded as acceptable by borrowers who have a communal approach to debt, rather than viewing debt as something held by single individuals. The book demonstrates how the rules around microcredit are often seen as irksome by the borrowers, how lenders often charge high rates of interest and work primarily to preserve their institutions, thereby going against the spirit of the microcredit movement, and how borrowers often end up on a downward spiral, deeper and deeper in debt. Overall, the book argues that although microcredit does much good, it also has many drawbacks.

A unique two-volume examination of the progress women have

Access Free A Billion Bootstraps Microcredit Barefoot Banking And The

made in achieving political equality, *Women and Politics around the World* addresses both transnational and gender-related issues as well as specific conditions in more than 20 countries. * Topical essays on a broad range of gender-related policy issues, written by international scholars * Focused explorations of women's political and economic progress in more than 20 individual countries * More than 70 photographs of both elected officials and women from all walks of life in countries around the world * More than 50 tables and charts presenting relevant data * Approximately 20 sidebars with additional in-depth coverage of important policy trends and events

Since its emergence in the 1970s, microfinance has risen to become one of the most high-profile policies to address poverty in developing and transition countries. It is beloved of rock stars, movie stars, royalty, high-profile politicians and 'troubleshooting' economists. In this provocative and controversial analysis, Milford Bateman reveals that microfinance doesn't actually work. In fact, the case for it has been largely built on hype, on egregious half-truths and – latterly – on the Wall Street-style greed of those promoting and working in microfinance. Using a multitude of case studies, from India to Cambodia, Bolivia to Uganda, Serbia to Mexico, Bateman demonstrates that microfinance actually constitutes a major barrier to sustainable economic and social development, and thus also to sustainable poverty reduction. As developing and transition countries attempt to repair the devastation wrought by the global financial crisis, *Why Doesn't Microfinance Work?* argues forcefully that the role of microfinance in development policy urgently needs to be reconsidered.

In this work, Caroline Shenaz Hossein explores the politics, histories and social prejudices that have shaped the legacy of microbanking in Grenada, Guyana, Haiti, Jamaica and Trinidad.
