Stertil Stokvis adds: "Our X Series dock levellers incorporate a telescopic lip which extends in line with the platform. Precise control of the lip extension allows it to be placed accurately onto the rear of the vehicle deck, so that vehicles can be fully loaded or unloaded by pallet truck. "In addition, the innovative Combilok is an effective vehicle restraint system that improves safety at ...

Read Free Dock Leveller Stertil Stokvis X Extending Lip Dock

This guidance is relevant for anyone with responsibility for the safe operation of lift trucks, eg employers, controllers of worksites, managers, supervisors or operators. Other people involved with lift trucks, eg TU health and safety representatives, may also find it useful. The guidance does not, however, replace formal training. The main areas covered are: the law; types of lift truck; lift truck operators; training; authorisation to drive; the working area; protecting pedestrians and operators; operation of lift trucks; trailers and loading platforms; maintenance; and two appendices covering training bodies and medical standards for lift truck operators.

This publication is aimed at managers in all industries. It explains why human factors are important in health and safety and how they need to be assessed and managed in the same way as other risk factors. It gives practical advice on how to develop systems designed to take account of human capabilities and fallibilities.
