Invites animal lovers to share a day in the life of a koala, offering images of a baby koala emerging from its mother's pouch before exploring the great world beyond.

A stunning visual and personal journey in search of the iconic big cat, the snow leopard. The snow leopard, known as the ghost of the mountains, is an elusive predator that has captured the human imagination for eons. Yet, by nature secretive, living at altitudes of up to 19,000 feet in one of the world's harshest environments, it is notoriously difficult to see. Those lucky enough to encounter one speak of the experience as momentous, transformative, even spiritual. In this handsomely illustrated, eloquent book, published in partnership with the Snow Leopard Conservancy, world-renowned wildlife photographers, naturalists, and conservationists take the reader closer than most humans will ever get to knowing snow leopards and understanding why these beautiful big cats have for so long been considered the most mysterious of all. More than 130 breathtaking photographs—all taken in the wild, and none with camera traps—accompany personal narratives and anecdotes that convey the experience of learning to see; the patient pursuit, following the tracks and other sign for a momentary glimpse; an unexpected encounter; watching the predator hunt; a magical moment with a mother and her cubs. A special "seek and find" section challenges readers to spot the snow leopard—to discern camouflage from rock and snow. The text also relates the natural history of the snow leopard, its cultural significance and place in lore, its interactions with local peoples, and information about its conservation. Royalties from the sales of Searching for the Snow Leopard support the Snow Leopard Conservancy and its programs.

A spellbinding new Nature Storybook about one of the most beautiful creatures in the world, with words by Planet Earth producer Justin Anderson and pictures by award-winning Patrick Benson. "Something moves in the rocks ahead. My hands start to tremble. My heart is beating fast. There, just a few footsteps away, is a snow leopard." Join us on a journey high into the snowy peaks of the Himalaya, and

discover the secret world of a rare and utterly majestic creature - how it has adapted to the harsh environment it lives in and how it looks after its young. Complete with an index and a conservation note, this is a wonderful addition to the series and the debut of an exciting new voice in non-fiction writing for children.

Documents the survival story of a Pakistan snow leopard that was rescued as an orphaned cub and taken in by scientists from the Wildlife Conservation Society, who placed him with the Bronx Zoo.

Silently they stalk, carefully they creep, with perfect precision, they pounce! Face it folks, leopards are just SO COOL. Leopards are among the world's top predatory big cats, but that's just ONE reason why they are SO COOL. So who wouldn't want to hang out with them to learn more? These books blend awesome animal photos with silly quips and info that will delight young readers and animal enthusiasts. For example, kids can learn that leopards are the best climbers of all the big cats, that they have excellent night vision, and that black panthers are just leopards that are born black. This is the perfect little reader to start kids' brains buzzing and keep them laughing during downtime, bedtime, or anytime!
