Graphics recognition is a subfield of document image analysis that deals with graphical entities in engineering drawings, sketches, maps, architectural plans, musical scores, mathematical notation, tables, and diagrams.

~~Graphics Recognition. New Trends and
Challenges | SpringerLink~~

We've all encountered design trends. The kind that inspire you and the kind that make you question how they even became trends. Like beveled and embossed everything in the 90s—that was never a good idea. Or comic sans. Or worse, intense drop shadows. Nonetheless, graphic design trends are drivers of growth and a means of educating
