Fossils don't just show how living things have changed; they can also help us understand how the Earth has changed. Over millions of years the Earth's surface shifts and changes. For example, rocks...

~~What can we learn from fossils? - BBC Bitesize~~

How Do Fossils Show Change? Most organisms live, die, and decompose. They leave no traces of having lived. Under certain conditions, an organism's remains or tracks may be preserved as a fossil. Fossils give clues about how an organism looked and where it lived. They are often used by scientists as evidence of change.
