The main blot on the i10's report card is the crude and clunky five-gear automated manual transmission - a replacement for the traditional auto gearbox used in the old model. You ' re better off sticking to the manual. Standard equipment levels are very good and there are no basic models in the line-up.

Eleven murders over a period of four years sent shockwaves through the Krugersdorp community and made headlines nationwide. Eventually these murders were connected to Cecilia Steyn and her cult, Electus per Deus (chosen by God). Members of the cult were willing to do anything for Cecilia - even if it meant committing murder. The murderers are intelligent, ordinary people - a teacher, a financial broker, and a teenager who - despite her involvement in the murders - still managed to obtain six distinctions in matric and be accepted to medical school. Their victims merely kept their appointments, not knowing that their appointments were with death. Who is Cecilia Steyn? How can one person manipulate five others to commit murder and perjury on her behalf? How did Satanism contribute to all of this? How did inexperienced criminals manage to evade capture for so long? Jana Marx answers these and other questions in this true-crime account that led to one of the most sensational murder cases in the country's history. Through interviews with those in the inner circle, evidence given in court and police files covering a period of four years, Marx attempts to answer the public's questions and provide a view of the inner workings of such a cult.

The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup! TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. This book will keep money in your pocket and add experience to your résumé, but more important, it will help you get your Mopar back on the road! p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

For courses in managerial economics, this textbook, now in its third edition, is specifically designed for the students of management, commerce and economics to provide them with a thorough understanding of economic concepts and methodologies and the economic environment influencing managerial decisions. The book first lays a sound theoretical foundation of basic concepts, defi-nitions, and methodologies of economics, being an essential prerequisite for students to understand the theory of managerial economics. All the basic

principles are introduced with mathematical complexity kept to minimum—essentials of applied mathematics needed for comprehending the under-lying ideas of models and theories of economics are covered. The book then moves on to systematically enumerates the various tools of analysis such as demand analysis, cost analysis, elasticity of demand, production analysis and price theory, and highlights their importance in managerial decision making through the concept-example format, wherein a concept discussed is immediately followed by a practical situation so that the reader can understand its application. The end-of-chapter questions reinforce a deeper understanding of the concepts introduced in the text. An exclusive chapter on linear programming emphasizes the importance of this mathematical tool in finding optimal business solutions. The book concludes with an exhaustive introduction to macroeconomics, analyzing in depth the concepts of inflation, income, savings and investments, and growth and employment in Indian context. New to the Third Edition Revised and expanded coverage of evolution of economic thought, and basic economic terms. An enriched inclusion of demand forecasting techniques, and the Cobb-Douglas production function. An extensive illustration of the commonly used pricing methods and market power. Value addition to the existing list of case studies to enhance students ' understanding of the theoretical concepts.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.
