including all HTML and browser objects. The reference contains examples for all properties, methods and events, and is continuously updated according to the latest web standards.

JavaScript Tutorial

JavaScript can "display" data in different ways:

Writing into an HTML element, using `innerHTML`.

Writing into the HTML output using `document.write ()`.

Writing into an alert box, using `window.alert ()`.

JavaScript Output -

As with many things in JavaScript, creating an object often begins with defining and initializing a variable. Try entering the following line below the JavaScript code that's already in your file, then saving and refreshing: `const person = {};` Now open your browser's JavaScript console, enter `person` into it, and press Enter / Return.
