The definitive book on mining the Web from the preeminent authority.

In response to requests by science teachers for guidance on the process of mentoring in schools, this text provides an interactive, activities-based resource. It takes into account the progressive development of skills and competencies, for all those involved in the training of science teachers; pre-service, in-service and quality control. Activities are directly related to classroom and laboratory planning, organisation and management and include general question and answer exercises.; The book covers nine areas of science teacher competence crossed with five levels of progression to give a flexible programme of training. Each activity has a commentary for mentors and notes for student teachers, and discusses the rationale behind each activity. Five activities are written specifically to help mentors review progress at each of the five levels.; Additionally, it can be used by: experienced teachers for refreshing their own practice; Heads of Science Departments for upgrading science teaching within the departments; and those concerned with quality control and certification to recommend activities, taken from the book, to aid further professional development.

Going to university is exciting, but it can also be stressful. What courses should I take? What program should I choose? Will I get a job after graduation? This book shows that the best preparation for success on the job, and in life, is succeeding at university. Teamwork, meeting deadlines, overcoming challenges, writing well, and dealing with people are essential in any professional job. These same skills are also vital to becoming a strong student. This practical guide shows you how to master the critical skills and strategies for success at school, work, and in life.
