Timm's The BMW M60 M62 and M62TU V8 Engine Working on the BMW V8 engines - it's not as scary as it first seems Above is the M60 engine, the first of the modern BMW V8's, it was sold as a 3-Litre (M60B30) and 4-Litre (M60B40) History and development M60 BMW introduced the M60 engine in 1992, fitted to the E32 730i and 740i.

Timm's BMW_M60_M62_M62TU_Engine Details and common problems

The BMW M62 is a V8 DOHC piston engine which replaced the M60 and was produced from 1994-2005. Compared with its M60 predecessor, the M62 features Alusil cylinder liners (in markets where high sulphur fuel was sold) and a single row timing chain. In 1998, variable valve timing (called VANOS by BMW) was added to the M62.

On both the M62 and M62TUB engine this thermostat heater causes all sorts of problems. On the pre-facelift E38 and E39 you don't get the Engine Failsafe warning - the engine just stops and won't start again. This is because the main DME fuse has failed due to the damage to the heater loom as seen below:
