Dan Cohrs is faced with making recommendations for the hurdle rates at Marriott Corporation and its three divisions utilizing CAPM and WACC.

Case Study: Marriot Corporation : the Cost of Capital...

Marriott cost of capital Objective: 1) Calculate the divisional and the company cost of capital and explain the calculation. 2) Evaluate Marriott's use of company cost-of-capital rate for the individual divisions. Cost of Capital for Lodging Division can be expressed as  $CC = W_e \cdot C_e + W_d \cdot C_d$ . For the weights of debt and equity (We and Wd), the 1988 target-schedule rates of debt-to-assets and debt-to-equity were used as the only measures available in the case.

Essay about Marriott Corporation: the Cost of Capital...

Marriott was to use a single corporate hurdle rate then they will be using the 11.39% rate which is for the entire company. By Marriott using this rate, then any project that arises out of the lodging division will be rejected since its cost of capital of 9.25% is lower than the cost of capital for the company. Using
