In the vast majority of ghost stories, the reader's gateway into the tale is the point of view of the person being haunted. In Margaret Oliphant's unique take on the genre, however, we're granted both sides of the story. This tale of a mysteriously missing will is enlivened (so to speak) by the "voice" of the deceased woman of the title, Old Lady Mary.

This book is the product of a collaborative effort involving partners from Africa, Asia, Europe and Latin America who were funded by the International Development Research Centre Programme on Women and Migration (2006-2011). The International Institute of Social Studies at Erasmus University Rotterdam spearheaded a project intended to distill and refine the research findings, connecting them to broader literatures and interdisciplinary themes. The book examines commonalities and differences in the operation of various structures of power (gender, class, race/ethnicity, generation) and their interactions within the institutional domains of intra-national and especially inter-national migration that produce context-specific forms of social injustice. Additional contributions have been included so as to cover issues of legal liminality and how the social construction of not only femininity but also masculinity affects all migrants and all women. The resulting set of 19 detailed, interconnected case studies makes a valuable contribution to

reorienting our perceptions and values in the discussions and decision-making concerning migration, and to raising awareness of key issues in migrants' rights. All chapters were anonymously peer-reviewed. This book resulted from a series of projects funded by the International Development Research Centre (IDRC), Canada.

In Australia and New Zealand, many public projects, programs and services perform well. But these cases are consistently underexposed and understudied. We cannot properly 'see'—let alone recognise and explain—variations in government performance when media, political and academic discourses are saturated with accounts of their shortcomings and failures, but are next to silent on their achievements. *Successful Public Policy: Lessons from Australia and New Zealand* helps to turn that tide. It aims to reset the agenda for teaching, research and dialogue on public policy performance. This is done through a series of close-up, in-depth and carefully chosen case study accounts of the genesis and evolution of stand-out public policy achievements, across a range of sectors within Australia and New Zealand. Through these accounts, written by experts from both countries, we engage with the conceptual, methodological and theoretical challenges that have plagued extant research seeking to evaluate, explain and design successful public policy. Studies of public policy successes are rare—not just in Australia and New Zealand, but the world over. This book is embedded in a broader project exploring policy successes globally; its companion volume, *Great Policy Successes* (edited by Paul 't Hart and Mallory Compton), is published by Oxford University Press (2019).

For millions of people worldwide, nurses are the difference between life and death, self-sufficiency and dependency, hope and despair. But a lack of understanding of what nurses really do -- one perpetuated by popular media's portrayal of nurses as simplistic archetypes -- has devalued the profession and contributed to a global shortage that constitutes a public health crisis. Today, the thin ranks of the nursing workforce contribute to countless preventable deaths. This fully updated and expanded edition of *Saving Lives* highlights the essential roles nurses play in contemporary health care and how this role is marginalized by contemporary culture. Through engaging prose and examples drawn from television, advertising, and news coverage, the authors detail the media's role in reinforcing stereotypes that fuel the nursing shortage and devalue a highly educated sector of the contemporary workforce. Perhaps most important, the authors provide a wealth of ideas to help reinvigorate the nursing field and correct this imbalance. As American health care undergoes its greatest overhaul in decades, the practical role of nurses -- that as autonomous, highly skilled practitioners -- has never been more important. Accordingly, *Saving Lives* addresses both the sources of, and prescription for, misperceptions surrounding contemporary nursing.

In *Left of Karl Marx*, Carole Boyce Davies assesses the activism, writing, and legacy of Claudia Jones (1915–1964), a pioneering Afro-Caribbean radical intellectual, dedicated communist, and feminist. Jones is buried in London's Highgate Cemetery, to the left of Karl Marx—a location that Boyce Davies finds fitting given how Jones expanded Marxism-Leninism to incorporate gender and race in her political critique and activism. Claudia Cumberbatch Jones was born in Trinidad. In 1924, she moved to New York, where she lived for the next thirty years. She was active in the Communist Party from her early twenties onward. A talented writer and speaker, she traveled throughout the United States lecturing and organizing. In the early 1950s, she wrote a well-known column, "Half the World," for the *Daily Worker*. As the U.S. government intensified its efforts to prosecute communists, Jones was arrested several times. She served nearly a year in a U.S. prison before being deported and given asylum by Great Britain in 1955. There she founded *The West Indian Gazette* and *Afro-Asian Caribbean News* and the Caribbean Carnival, an annual London festival that continues today as the Notting Hill Carnival. Boyce Davies examines Jones's thought and journalism, her political and community organizing, and poetry that the activist wrote while she was imprisoned. Looking at the contents of the FBI file on Jones, Boyce Davies contrasts Jones's own narration of her life with the federal government's. *Left of Karl Marx* establishes Jones as a significant figure within Caribbean intellectual traditions, black U.S. feminism, and the history of communism.
