A cylinder lawn mower or reel mower has anywhere between five to twelve exposed blades at the front of the mower that rotate trapping and slicing the grass blades against a fixed bottom plate like a pair of scissors. The more blades there are the better the cut. The grass box is at the front.

~~Which is better: A Rotary or Cylinder Lawn Mower~~

Cylinder & Rotary Lawn Mowers. For the moment we will ignore the power source of the lawnmower and concentrate on the cutting systems as this is the most important for lawn quality. In general there are two different types of cutting systems for lawn mowers. A cylinder lawn mower or reel mower has anywhere between five to twelve exposed blades at the front of the mower that rotate trapping and slicing the grass blades against a fixed bottom plate like a pair of scissors.

~~Which is better: A Rotary or Cylinder Lawn Mower~~

cylinder v rotary mowers Not all mowers are the same. When you are choosing to buy a new mower for your lawn Allett recommend that you consider the following points to be sure that you select the right mower for the results that you want to achieve with the time that you have available.

~~Which Lawn Mower—Rotary or Cylinder • Strimmer Shed~~

Rotary lawn mowers have just the one very high speed rotating blade underneath. The grass is chopped on impact by the blade. If the mower has a grass box it is usually behind, and on some models it can be removed if required. Our mowers in this range are available as petrol, electric or cordless/battery.

~~Rotary Lawn Mowers—Buy rotary mowers from the UK's No 1~~

Cylinder mowers are attractive to professionals because of the superior cutting mechanism. The blade of a rotary mower acts like a scythe—just like the grim reaper’s—slashing through the grass with a single blade. But a cylinder mower acts like a pair of scissors, gently shearing the grass between two blades with a rotating cutting cylinder.

Just get the most power in that width of lawnmower; they generally range from 900 watts to about 1500 watts for rotary mowers and upwards of 300 watts for cylinder mowers. With cylinder mowers you will need to mow at least twice a week as an electric cylinder mower will struggle with a whole week of late spring growth.

~~Which Lawn Mower is Best? Electric, Petrol, Battery or Push~~

Unlike a rotary mower which uses a spinning propeller like blade to slice the tips of the grass from above, cylinder lawn mowers use a rotating array or blades (almost like a roller with blades arranged around it) that cut the grass head on, rotating and cutting the grass when the blades pass by a corresponding fixed blade, trapping and cutting the grass.

~~Rotary Lawnmowers | Argos~~

There are brush and flail and mulching mowers. The mulching mowers will cut the grass to the specified height and cut it again. This is a good option if you like to leave the grass on the ground. You can also choose from two different types of blades. The reel/cylinder style or rotary blades are both available.
