These days we use our smartphones for nearly everything, but when choosing a new phone, it's helpful to narrow down your primary purpose. Figuring out what you'll use your phone for can help you pick a model and a voice and data plan. Here are a few common uses for seniors: Making emergency phone calls; Video chatting with grandchildren

Cellphone Guide for Seniors | Updated for 2020 ...

Using your phone usually calls for access to the internet. If you're not in a location where you can use Wi-Fi, you have to rely on a mobile data network to browse the web or check your social media. Mobile data, either as part of a cellular service or a pay-as-you-go plan, costs money. Unless you have an unlimited data plan, the more you use the more you pay.

4 Simple Ways to Reduce Mobile Data Usage

To overcome the problem of reduced internal storage space, several high-end smartphones are sold with free cloud storage accounts. This could be 10, 20 or even 50GB. Whilst this is a nice extra, bear in mind that not all data and files can be saved to cloud storage (apps for example).
