Yellow Emperor

The Neijing is one of the most important classics of Taoism, as well as the highest authority on traditional Chinese medicine. Its authorship is attributed to the great Huang Di, the Yellow Emperor, who reigned during the third millennium BCE. This new translation consists of the eighty-one chapters of the section of the Neijing known as the Suwen, or "Questions of Organic and Fundamental Nature." (The other section, called the Lingshu, is a technical book on acupuncture and is not included here.) Written in the form of a discourse between Huang Di and his ministers, The Yellow Emperor's Classic of Medicine contains a wealth of knowledge, including etiology, physiology, diagnosis, therapy, and prevention of disease, as well as in-depth investigation of such diverse subjects as ethics, psychology, and cosmology. All of these subjects are discussed in a holistic context that says life is not fragmented, as in the model provided by modern science, but rather that all the pieces make up an interconnected whole. By revealing the natural laws of this holistic universe, the book offers much practical advice on how to promote a long, happy, and healthy life. The original text of the Neijing presents broad concepts and is often brief with details. The translator's elucidations and interpretations, incorporated into the translation, help not only to clarify the meaning of the text but also to make it a highly readable narrative for studentsas well as for everyone curious about the underlying principles of Chinese medicine.

Lisbon, 1898: Antonio Maria, surgeon and notorious playboy, returns home after a long absence to learn his beloved father has syphilis, the scourge of both rich and poor. Determined to find a cure, Antonio sets sail for Peking, to study under the evasive but renowned Dr. Xu. But Dr. Xu does not intend to give away his knowledge, and Antonio suddenly falls in love with his assistant, the elusive Fumi. The threat of the advancing Boxer rebellion hangs over the Summer Palace, and Antonio and Fumi must decide whether to flee together or remain in China. Kunal Basu's lush, haunting tale invites comparisons to Michael Ondaatje's best work. This superb novel conjures a man discovering the love that will force him to question everything.

The Yellow Emperor's Classic of Internal Medicine has become a landmark in the history of Chinese civilization. Written in the form of a dialogue in which the emperor seeks information from his minister Ch'i-Po on questions of health and the art of healing, it is the oldest known document in Chinese medicine. Ilza Veith's extensive introduction and monumental translation, first published in 1949, make available the historical and philosophical foundations of traditional practices that have seen a dynamic revival in China and throughout the West. A new foreword by Linda L. Barnes places the translation in its historic contexts, underlining its significance to the Western world's understanding of Chinese medical practice.

An indefatigable discoverer and preserver of lost traditions in the field of classical Chinese medicine, Liu Lihong has done it again!The Yellow Emperor's Inner Transmission of Acupuncture features a passionate and clinically relevant synthesis of his discipleship with Yang Zhenhai, one of the last remaining master practitioners of Daoist acupuncture in mainland China. At the forefront of an international discourse on the definition and clinical significance of classical Chinese medicine, Yang and Liu promote yet another holistic medical system that radically contrasts the current penchant for symptom-oriented procedures. This English edition of their book lifts an important esoteric acupuncture lineage out of obscurity and presents it to us in complete and accessible form. The holistic approach has also defined Liu's relentless search for the heart of Chinese medicine during the last three decades, driving his commitment to become the promoter of a diverse spectrum of healing traditions that exemplify the classical standards of Chinese medicine.

The Yellow Emperor's Classic has become a landmark in the history of Chinese civilization. Since 1949, when this first translation of the olest known document in Chinese medicine was published, traditional medical practice has seen a dynamic revival in China and throughout many countries in the Western world. Elements of this time-honored therapy, including acupuncture and the harmony of human spirit with the natural world, have become part of mainstream medical practice; The Yellow Emperor's Classic provides the historical and philosophical foundation of this practice. Ilza Veith provides an extensive introduction to her monumental translation of this classic work, which is written in the form of a dialogue in which the emperor seeks information from his minister Ch-I Po on all questions of health and the art of healing.

A horse complains of a chest as tight as a bear's embrace, a goat bleats about skin as dry as parchment, and a rat describes his urine as darker than soya sauce. Join these lively characters and their friends as they seek diagnosis from wise animal sages and the yellow monkey emperor. Covering 78 syndromes of Chinese medicine, these cartoons graphically illustrate the disturbances and illnesses that can affect the organs of the body, or Zang Fu, as they are understood in Chinese medicine. They are accompanied by a concise list of symptoms for easy diagnostic reference. Combining Damo Mitchell's deep knowledge and experience with Spencer Hill's witty cartoons, this is a fun way to learn, remember and be entertained by the syndromes and their symptoms.

Heritage and Religion in East Asia examines how religious heritage, in a mobile way, plays across national boundaries in East Asia and, in doing so, the book provides new theoretical insights into the articulation of heritage and religion. Drawing on primary, comparative research carried out in four East Asian countries, much of which was undertaken by East Asian scholars, the book shows how the inscription of religious items as "Heritage" has stimulated cross-border interactions among religious practitioners and boosted tourism along modern pilgrimage routes. Considering how these forces encourage cross-border links in heritage practices and religious movements in China, Taiwan, South Korea, and Japan, the volume also questions what role heritage plays in a region where Buddhism, Taoism, and other various folk religious practices are dominant. Arguing that it is diversity and vibrancy that makes religious discourse in East Asia unique, the contributors explore how this particularity both energizes and is empowered by heritage practices in East Asia. Heritage and Religion in East Asia enriches understanding of the impact of heritage and religious culture in modern society and will be of interest to academics and students working in heritage studies, anthropology, religion, and East Asian studies.

Yellow Emperor

From Kwame Mbalia and Prince Joel David Makonnen comes an Afrofuturist adventure about a mythical Ethiopian empire. Sci-fi and fantasy combine in this epic journey to the stars. Yared Heywat lives an isolated life in Addis Prime -- a hardscrabble city with rundown tech, lots of rules, and not much to do. His worrywart Uncle Moti and bionic lioness Besa are his only family... and his only friends. Often in trouble for his thrill-seeking antics and wisecracking sense of humor, those same qualities make Yared a star player of the underground augmented reality game, The Hunt for Kaleb's Obelisk. But when a change in the game rules prompts Yared to log in with his real name, it triggers an attack that rocks the city. In the chaos, Uncle Moti disappears. Suddenly, all the stories Yared's uncle told him as a young boy are coming to life, of kingdoms in the sky and city-razing monsters. And somehow Yared is at the center of them. Together with Besa and the Ibis -- a game rival turned reluctant ally -- Yared must search for his uncle... and answers to his place in a forgotten, galaxy-spanning war.

In the first comprehensive and analytical study of therapeutic concepts and practices in China, Paul Unschuld traced the history of documented health care from its earliest extant records to present developments. This edition is updated with a new preface which details the immense ideological intersections between Chinese and European medicines in the past 25 years.
