**The Three Rs** in relation to science are guiding principles for more ethical use of animals in testing. They were first described by W. M. S. Russell and R. L. Burch in 1959. The 3Rs are:  
Replacement: methods which avoid or replace the use of animals in research  
Reduction: use of methods that enable

# Access Free Theory And Practice Of Animal

**Refinement**: use of methods that alleviate or minimize potential pain or distress of researchers to obtain comparable levels of information from fewer animals, or to obtain more information from the same number of animals. **Refinement**: use of methods that alleviate or minimize potential
