The second edition of this course has been expanded to include perspective and design. The course suits a wide range of O' level, School Certificate and Senior Secondary syllabuses such as those of Cambridge, WAEC, UNEB, TNEC, and CXC in particular it covers the new Kenya Certificate of Secondary Education and the Nigerian Senior Secondary School syllabuses.

Based on the work of the African Copyright and Access to Knowledge (ACA2K) research network, this book describes the legal and practical issues posed by copyright for access to learning materials in eight countries in Africa—Egypt, Ghana, Kenya, Morocco, Mozambique, Senegal, South Africa and Uganda. It identifies the policies and practices that would broaden this access.

'Welcome to the Knight Bus, emergency transport for the stranded witch or wizard. Just stick out your wand hand, step on board and we can take you anywhere you want to go.' When the Knight Bus crashes through the darkness and screeches to a halt in front of him, it's the start of another far from ordinary year at Hogwarts for Harry Potter. Sirius Black, escaped mass-murderer and follower of Lord Voldemort, is on the run - and they say he is coming after Harry. In his first ever Divination class, Professor Trelawney sees an omen of death in Harry's tea leaves... But perhaps most terrifying of all are the Dementors patrolling the school grounds, with their soul-sucking kiss... Having now become classics of our time, the Harry Potter ebooks never fail to bring comfort and escapism to readers of all ages. With its message of hope, belonging and the enduring power of truth and love, the story of the Boy Who Lived continues to delight generations of new readers.

Over the past two decades, projects supported by the International Development Research Centre (IDRC) have critically examined the ways in which information and communications technologies (ICTs) can be used to improve learning, empower the disenfranchised, generate income opportunities for the poor, and facilitate access to healthcare in Africa, Asia, Latin America and the Caribbean. Considering that most development institutions and governments are currently attempting to integrate ICTs into their practices, it is an opportune time to reflect on the research findings that have emerged from IDRC's work and research in this area. "Connecting ICTs to Development" discusses programmatic investments made by IDRC in a wide variety of areas related to ICTs, including infrastructure, access, regulations, health, governance, education, livelihoods, social inclusion, technical innovation, intellectual property rights and evaluation. Each chapter in this book analyzes the ways in which research findings from IDRC-supported projects have contributed to an evolution of thinking, and discusses successes and challenges in using ICTs as tools to address development issues. The volume also presents key lessons learned from ICT4D programming and recommendations for future work.
